**Read the following passage and mark the letter A, B, C or D on your answer sheet to indicate the correct answer to each of the questions from 18 to 21.**

Paragliding first became popular (18)\_\_\_\_\_ the 1970s and it is estimated that there are already 400,000 paragliders in Europe alone. The first world (19)\_\_\_\_\_ were held in 1979 and paragliding schools can now be found around the world. Paragliders say that they (20)\_\_\_\_\_ their sport simply for the love of flying, but the World Paragliding Association is busy trying to get the sport accepted as an Olympic sport. This will (21)\_\_\_\_\_ make paragliding even more popular. It will help athletes to find sponsors and it will attract more people to the air.

- 18.** **A.** on                      **B.** in                      **C.** of                      **D.** at  
**19.** **A.** championship      **B.** champion              **C.** champions              **D.** championships  
**20.** **A.** have                      **B.** make                      **C.** take                      **D.** do  
**21.** **A.** completely              **B.** immediately              **C.** constantly              **D.** increasingly

**Read the following passage and mark the letter A, B, C, or D on your answer sheet to indicate the correct answer to each of the questions from 22 to 25.**

Power plants that make electricity are often built on rivers. The cool water that is used to make electricity becomes hot as it runs through the plant. Then the heated water is returned to the river. When large amounts of warm water are dumped into a river, the river itself is heated. The temperature of the water may be raised only a few degrees, yet these few degrees can change animal and plant life. Heat causes a loss of oxygen in the water. Fish no longer do well, and some kinds die. Without enough oxygen, bacteria in the river cannot break down waste matter.

To solve the problem, we have begun to change how power plants work. Some power plants use cooling towers. The hot water goes into the tower, and heat escapes from the tower into the air. Once the heat has escaped, the water flows safely into the river. Other power plants release the hot water into the river in a new way. Instead of letting it all flow into one area, they scatter it. When the water goes to many spots, no one place gets too hot. With these new methods, rivers can come back to life. But it will take time.

22. The animal and plant life in the river may be changed because \_\_\_\_\_.
- A. fish no longer do well                      B. the waste matter can be broken down  
 C. the water temperature is raised         D. there is a loss of bacteria in the river
23. Power plants that make electricity \_\_\_\_\_.
- A. cause the water to be cool                 B. pollute the rivers  
 C. break down waste matter                 D. are often built on rivers
24. To solve the problem of the hot water, some power plants \_\_\_\_\_.
- A. scatter the hot water                      B. have begun to move to another place  
 C. let all the hot water flow into one area     D. release the hot water into the river
25. It can be inferred from the passage that \_\_\_\_\_.
- A. we have to apply new methods to change the way power plants work  
 B. we will have to stop building new power plants  
 C. we will have to build power plants that do not heat the water  
 D. nobody cares about the temperatures of our rivers

### WRITING TEST (2.5 points)

*Combine the two sentences into one sentence using the word(s) in brackets.*

26. We are crossing the meadow. We flew kites over it in our childhood. (*OVER WHICH*)
