- | | | | |
|--------------------------|------------------------|-----------------------|----------------------|
| 18. A. in | B. of | C. on | D. at |
| 19. A. reflect | B. make | C. bring | D. introduce |
| 20. A. constantly | B. increasingly | C. immediately | D. completely |
| 21. A. Official | B. Office | C. Officially | D. Offices |

Read the following passage and mark the letter A, B, C, or D on your answer sheet to indicate the correct answer to each of the questions from 22 to 25.

Power plants that make electricity are often built on rivers. The cool water that is used to make electricity becomes hot as it runs through the plant. Then the heated water is returned to the river. When large amounts of warm water are dumped into a river, the river itself is heated. The temperature of the water may be raised only a few degrees, yet these few degrees can change animal and plant life. Heat causes a loss of oxygen in the water. Fish no longer do well, and some kinds die. Without enough oxygen, bacteria in the river cannot break down waste matter.

To solve the problem, we have begun to change how power plants work. Some power plants use cooling towers. The hot water goes into the tower, and heat escapes from the tower into the air. Once the heat has escaped, the water flows safely into the river. Other power plants release the hot water into the river in a new way. Instead of letting it all flow into one area, they scatter it. When the water goes to many spots, no one place gets too hot. With these new methods, rivers can come back to life. But it will take time.

22. The animal and plant life in the river may be changed because _____.
- A. the waste matter can be broken down B. there is a loss of oxygen in the water
 C. the heat causes the bacteria in the river to die D. there is a loss of bacteria in the river
23. It can be inferred from the passage that _____.
- A. power plants are not built far from rivers
 B. we must build new power plants that do not heat the water
 C. power plants will stop working
 D. we will have to stop building new power plants
24. Cooling towers _____.
- A. are cooled by the air B. take oxygen out of the water
 C. scatter the hot water D. release the cool water into the river
25. When large amounts of warm water are dumped into a river, the river itself _____.
- A. becomes dirty B. becomes cool C. is heated D. flows faster

WRITING TEST (2.5 points)

Combine the two sentences into one sentence using the word(s) in brackets.

26. Many students attended the lecture yesterday morning. Some of them were from foreign countries. (**WHOM**)
27. I apologized to Miss White. I spilt her coffee. (**WHOSE**)
