Read the following passage and mark the letter A, B, C, or D on your answer sheet to indicate the correct answer to each of the questions from 7 to 11.

In 1994, the UN decided to bring together world leaders for an annual event, known as COP or 'Conference of Parties', to discuss climate change. This year's conference will review what has been achieved and discuss the key goals.

The first goal is to limit the global temperature rise to 1.5°C. This will require reducing global CO<sub>2</sub> emissions by 50 per cent by 2030, and by 2050 achieving a balance between the greenhouse gases released into the atmosphere and those removed from it.

The second goal is to reduce the use of coal, which is the dirtiest fuel and biggest source of planet-warming CO<sub>2</sub> emissions. Countries will have to stop building new coal **plants** and switch to clean sources of energy.

The third goal is to end deforestation. Forests remove CO<sub>2</sub> from the atmosphere and slow global warming. But when they are cut down or burnt, they release the carbon stored in the trees into the atmosphere as CO<sub>2</sub>. Stopping deforestation is, therefore, an effective solution to climate change.

The last key goal is to reduce methane emissions. Methane is a greenhouse gas that is more powerful than CO<sub>2</sub> at warming the earth. It is responsible for nearly one-third of current warming from human activities. Methane comes from farming activities and landfill waste. The production and use of coal, oil, and natural gas also release methane.

This conference is very important because this is the best last chance we have to slow global warming. World leaders, climate experts, organisations, and national representatives will carefully discuss these goals and agree on how to make global progress on climate change.

### BOOKS

Kids can be creatures of habit. Much like how they can watch the same movie over and over, some kids will stick to one author or genre of book (12) \_\_\_\_\_ they've fallen in love with. But does it matter if they're always reading the same type of book?

After all, isn't their love of reading in itself enough? Reading builds their imagination, develops their (13) \_\_\_\_\_ thinking skills, and improves their communication skills, amongst many other benefits.

Well, while a love of reading of any sort is to be nurtured, when a child only reads the same author or type of book, their growth and the benefits they gain may not be as broad if they were to explore more types of books. Coaxing them to open up to reading other genres can be a big (14) \_\_\_\_\_ for them in the long term.

They will get exposed to different types of characters and lifestyles when they read a wider range of writing. (15) \_\_\_\_\_, their favourite fantasy novels may spark their imagination, but true tales of life halfway around the world can trigger interest (16) \_\_\_\_\_ traveling and foster understanding of other cultures. It helps them develop a broad perspective on the world around them.
